📄 fahad-md-kamal

Career Summary

Senior Software Engineer with **5+ years** of experience designing, implementing, and scaling **cloud-native, multi-tenant infrastructure**. Proven track record of building reliable backend systems in **Python** and **TypeScript** that abstract over cloud providers. Expertise in event-driven architecture, messaging pipelines (**Kafka**, **Redis Pub/Sub**), containerization (**Docker**), and deploying services across **AWS** and **Azure** environments.

Skills

Backend & Core
Python, TypeScript, FastAPI, Django | DRF, AsyncIO

DevOps & Cloud
Docker, **AWS** (EC2/S3), **Azure** Functions, CI/CD, Microservices

Messaging & Data
Kafka, Redis Pub/Sub, PostgreSQL, Elasticsearch, Qdrant

Architecture
Multi-Tenant Design, Serverless, Event-Driven Architecture, REST APIs, WebSockets

AI & LLMs
LangChain, **RAG**, LangGraph, OpenAI, Azure OpenAI, Ollama

Education

The Greenwich University,
BSC (Hons) in CS
Jan 2017 – Dec 2020
London, UK

Certificates

IELTS
6.00 overall

DIA Programming
Python web development

Work Experience

BJIT Limited, Senior Software Engineer 
Jul 2023 – present | Dhaka, Bangladesh

- Engineered and optimized scalable microservices for a **multi-tenant** US cybersecurity SaaS platform, improving average API response times by **30%**.
- Architected an event-driven data pipeline processing **5M+ threat records** and leveraging **Redis Pub/Sub** for real-time updates, reducing data latency by **40%**.
- Led the migration of a legacy system to a **serverless architecture using Azure Functions**, demonstrating multi-cloud deployment capability.
- Developed full-stack features using **TypeScript/React** and Vue for client-facing applications.

Mevrik DCX, Senior Software Engineer 
Jan 2021 – Jul 2023 | Dhaka, Bangladesh

- Led backend development of an AI customer care platform, architecting the system to handle **10,000+ concurrent users** (a strong demonstration of **multi-tenant** scale).
- Designed the core microservice architecture using Django/FastAPI/PostgreSQL, integrating **Kafka** for asynchronous processing and **WebSockets** for real-time communication.
- Built **FastAPI SaaS onboarding** systems to automate the setup of client-specific platforms (multi-tenant automation).
- Maintained **99.9% uptime** on **Dockerized** on-prem infrastructure.

Alesha Tech Ltd., Software Engineer
Feb 2021 – Nov 2021 | Dhaka, Bangladesh

- Developed ERP & B2B APIs in Django serving 10K+ daily requests.
- Managed the complete SDLC from requirements gathering to production deployment.

Dream Array, Software Developer 
Sep 2019 – Nov 2021 | Dhaka, Bangladesh

- Built scalable **Django REST APIs** for B2B and healthcare systems, deploying services on **AWS EC2/RDS** with CI/CD integration.

Major Projects

IR Tool (RAG)
Mar 2025 – Jun 2025

Focus: Architected an AI application converting media into structured business content.
Impact: Reduced manual report generation time by **60%**.
Technologies: Built **RAG pipeline** using **LangChain** and **Azure OpenAI**. Integrated Azure Speech-to-Text and CosmosDB.

CyRisk Insight Engine (USA) , BJIT USA client
Jul 2023 – Aug 2024

Focus: Cybersecurity platform analyzing threat intelligence data.
Impact: Processed **5M+ threat records** in **Elasticsearch**. Reduced data latency by **40%** and improved API response latency by **35%**.
Technologies: Scalable microservices using **Django REST** and **FastAPI**. Deployed serverless pipelines (AWS Lambda & S3).

Mevrik Digital Customer Care Experience (RAG) 
Nov 2021 – Jul 2023

Focus: Backend development for an AI-driven customer care platform.
Impact: Handled **10,000+ concurrent users**. Built ML chatbots handling **10M+ conversations/month**. Maintained **99.9% uptime**.
Technologies: Django backend. Integrated **Dialogflow NLP** and built real-time chat via **WebSockets/Redis Pub/Sub**.
